<b>Activity:</b>	Mobilising environmental knowledge for policy, industry and society
<b>Area:</b>	6.5 Mobilising environmental knowledge for policy, industry and society
<b>Topics:</b>	6.5-1 Accelerating progress towards the Green Economy
<b>Funding Scheme:</b>	Coordination and Support Action (coordinating action)
<b>Call Budget:</b>	17,0 Mio. €
<b>Particular Requirements:</b>	Activities should focus on developing and supporting a network for global exchange of best practices between EU and non-EU actors involved in sustainable consumption and production.

<b>Activity:</b>	Coping with climate change
<b>Area:</b>	6.1 Coping with climate change
<b>Topics:</b>	6.1-1 Climate-related ocean processes and combined impacts of multiple stressors on the marine environment
<b>Funding Scheme:</b>	Collaborative Project
<b>Call Budget:</b>	248,0 Mio. €
<b>Particular Requirements:</b>	Topics requiring or benefitting from the involvement of non-EU partners include all topics under Challenge 6.1 'Coping with Climate Change'. The participation of non-EU partners in all research proposals may bring added value due to the global nature of climate change research. Within this global context, projects may also consider addressing those parts of the globe - beyond geographical Europe – which may be more affected by climate change and by its consequences, such as polar areas, small island states or European outermost regions where relevant.

## Space

<b>Specific Programme:</b>	Cooperation
<b>Theme:</b>	Space
<b>Call Identifier:</b>	FP7-SPACE-2013-1
<b>Topic Identifier:</b>	SPA.2013.2.1-01
<b>Publication Date:</b>	10.07.2012
<b>Deadline:</b>	21.11.2012
<b>EC FP7 Weblink:</b>	<a href="http://ec.europa.eu/research/participants/portal/page/cooperation?callIdentifier=FP7-SPACE-2013-1">http://ec.europa.eu/research/participants/portal/page/cooperation?callIdentifier=FP7-SPACE-2013-1</a>
<b>FFG/EIP Weblink:</b>	<a href="http://rp7.ffg.at/fp7-space-2013-1">http://rp7.ffg.at/fp7-space-2013-1</a>
<b>Activity:</b>	2. Strengthening the foundations of Space science and technology
<b>Area:</b>	2.1 Research to support space science and exploration
<b>Topics:</b>	2.1-01 Exploitation of space science and exploration data
<b>Funding Scheme:</b>	Collaborative Projects (small or medium-scale focused research project)
<b>Call Budget:</b>	126,0 Mio. €

**Particular Requirements:** In the context of international cooperation, a diversified approach is a key element in Europe's space policy. Candidates for cooperation among other established or emerging space powers are the United States, Russia, Canada, People's Republic of China, India, Japan and the Ukraine. Following bilateral consultations with Ukraine during 2011, topics which are of mutual interest and benefit for European industry and the Ukraine will be highlighted in the call. In general, the participation of countries for which a specific Space dialogue (e.g. South Africa) or S&T cooperation agreements (e.g. Brazil) are in place, or third countries included under the ICPC list (International Cooperation Partner Country (ICPC) is a third country which the Commission classifies as lowincome, lower-middle-income or upper-middle-income country and which is identified as such in the work programmes, see list in Annex 1 to the Work Programme "Cooperation"), is particularly welcome. The use of space applications can contribute to their economic and social development and support environmental protection.

This topic is open to international cooperation and should focus on downstream R&D activities complementing space missions, such as the effective scientific exploitation of existing data. Cooperation with international partners from third countries (ICPC), or countries which have signed an agreement with the EU covering Science and Technology, as well as other space-faring nations (e.g. US, Japan) will help to expand the use of data, the corresponding data processing and management methods in third countries, and enhance research partnerships with emerging or established space powers. Therefore such international partners will be eligible to participate and to be funded and this aspect will be taken into account in the evaluation.

<b>Activity:</b>	2. Strengthening the foundations of Space science and technology
<b>Area:</b>	2.1 Research to support space science and exploration
<b>Topics:</b>	2.1-02: Earth-analogue research preparing for space exploration
<b>Funding Scheme:</b>	Collaborative Projects (small or medium-scale focused research project)
<b>Call Budget:</b>	126,0 Mio. €

**Particular Requirements:** In the context of international cooperation, a diversified approach is a key element in Europe's space policy. Candidates for cooperation among other established or emerging space powers are the United States, Russia, Canada, People's Republic of China, India, Japan and the Ukraine. Following bilateral consultations with Ukraine during 2011, topics which are of mutual interest and benefit for European industry and the Ukraine will be highlighted in the call. In general, the participation of countries for which a specific Space dialogue (e.g. South Africa) or S&T cooperation agreements (e.g. Brazil) are in place, or third countries included under the ICPC list (International Cooperation Partner Country (ICPC) is a third country which the Commission classifies as low-income, lower-middle-income or upper-middle-income country and which is identified as such in the work programmes, see list in Annex 1 to the Work Programme "Cooperation"), is particularly welcome. The use of space applications can contribute to their economic and social development and support environmental protection.

Cooperation with international partners from third countries (ICPC), or countries which have signed an agreement with the EU covering Science and Technology, as well as other space-faring nations (e.g. US, Japan) will help to enhance research partnerships with emerging or established space powers. Therefore such international partners will be eligible to participate and to be funded and this aspect will be taken into account in the evaluation.

<b>Activity:</b>	7.2. Bilateral coordination for the enhancement and development of S&T Partnerships
<b>Area:</b>	7.2.1 Area 1: Canada, India, Japan, Republic of Korea
<b>Topics:</b>	
<b>Funding Scheme:</b>	Coordination and Support Action (supporting action)
<b>Call Budget:</b>	8,0 Mio. €
<b>Particular Requirements:</b>	The consortium must include at least one participant from the targeted country (additional eligibility criterion; Canada, India, Japan, Republic of Korea). It is considered essential that the main third country participants be either public authorities responsible for the follow-up of the S&T cooperation agreement or any organisation, which has received the necessary mandate from the national authorities. The funding of participants from industrialised countries would be allowed for this activity if it is considered essential for the success of the action. The participation of public authorities, national agencies and research organisations from Member States and/or Associated countries is encouraged. The participation of industry and SMEs associations from Member States and/or Associated countries and the targeted country is also encouraged. The action should set up an advisory board that will be composed of representatives of authorities responsible for the S&T agreement and, where appropriate, of high level experts originating from the Member States and/or Associated countries and the targeted third country.

<b>Activity:</b>	2.1 Research for SMEs
<b>Area:</b>	
<b>Topics:</b>	
<b>Funding Scheme:</b>	Research for the benefit of specific groups (in particular SMEs)
<b>Call Budget:</b>	252,31 Mio. €
<b>Particular Requirements:</b>	Although international cooperation is not the main aim of this programme, it can play a role. SMEs can outsource work to RTD performers from any country, including third countries, if these have the right expertise and the research activity provided is cost-effective. This may also be helpful to SMEs to expand their markets. In addition, information and good practices based on the European experience in relation to SMEs and research can be disseminated to third countries in order to enable them to create the necessary structures and support mechanisms for the creation of viable and effective SME support activities.

<b>Area:</b>	5.2.2.3 Research and Coordination Actions on methods in science education
<b>Topics:</b>	5.2.2.3-1 Research on the role of teaching methods in addressing low achievement in the field of mathematics, science and technology (MST)
<b>Funding Scheme:</b>	Coordination and Support Actions (Supporting Action)
<b>Call Budget:</b>	51,7 Mio. €
<b>Particular Requirements:</b>	International cooperation is recommendable in terms of best practices and transferability of teaching and assessment methods. The research should have significant wider benefits across Europe beyond those accruing directly to project participants. In this respect, it should address several educational systems in Europe, in order to produce results that may be relevant for other countries with similar characteristics.
