Experience in UE R&D projects

- **M-Cast** (Multilingual information query and aggregation, eContent program project). The goal of the project was to develop an innovative set of tools that allow to search for valuable data in multi-lingual, distributed information sources. **Consortium Coordination.** The project is finished.
- **ReDSeeDS** (Requirements Driven Software Development System). **Consortium Coordinaton.** Continuing till November 2009.
- **ICONS** (Intelligent Content Management System). The goal of the project was to develop a knowledge-based system to manage multimedia information from distributed and heterogeneous data sources. **Participation in the Consortium.** The project is finished.

All submitted projects' proposals got EU financing!

Our interests in 7 FP ICT

In Call 5 we would like to **coordinate and take part** in the projects related to:

- User experience management
- Intelligent information management
- Service delivery solutions for future networks.

In future Calls we are interested in:

- **7.3 ICT for Governance and Policy Modelling**
- **6.3 ICT for Energy Efficiency**
