**About the Portal**

This portal is dedicated to provide up-to-date information regarding science and technology (S&T) cooperation between the European Union and the United States.

This web portal consists of three dedicated web-sites:

- Home** will provide you an overview of EU-U.S. S&T cooperation, which includes
  - various cooperation schemes such as EU-U.S. S&T Agreements, bilateral S&T agreements between member states and the U.S as well as cooperation within the 7th Framework Programme;
  - the most up-to-date S&T News from EU and U.S.;
  - Quarterly E-Newsletter
  - Access to relevant Documents & Publications
  - Links
- BILAT-USA** Project will provide information on the 7th Framework Programme including the open calls targeting specifically U.S. researchers/research

**About the Projects**

Two new projects were launched in October 2009: "BILAT-USA" and "Link2US". Supported by the European Commission's 7th Framework Programme (FP7), these complementary projects enhance EU-U.S. S&T cooperation through dialogues and information exchange activities between the EU and the United States and create greater awareness on both sides of the range of opportunities for S&T cooperation. The outcome of these activities will contribute to overcoming barriers to cooperation, developing cooperative research policies and topics, and formulating respective FP7 projects.

In more pragmatic terms, the BILAT-USA and Link2US projects will together serve as an information platform for identifying funding programmes for cooperative research projects and facilitator fostering trans-Atlantic EU-U.S. cooperation.

# Internationale Kooperation im 7. EU RP

## **‘Cooperation’**

1. Health
2. Food, Agriculture and Fisheries, and Biotechnology
3. Information Communication Technologies
4. Nanosciences + Nanotechnologies, Materials + new Production Technologies
5. Energy
6. Environment (incl. climate change)
7. Transport (incl. Aeronautics)
8. Socio-economic sciences + the Humanities
9. Space
10. Security

**‘Ideas’** -Frontier Research  
Single Teams, Criteria  
Excellence, European  
Research Council

**‘People’**  
Mobility and Career  
Development of People

**‘Capacities’**

- Research Infrastructure
- Research for SMEs
- Regions of Knowledge  
Research Potential
- Science in Society
- Coherent development of  
research policies, International  
cooperation
