

SESAM Release 7.2.7

Release Notes

Release 7.2.7 of SESAM is a minor software release containing a number of new functionalities and several bug fixes.

1. NEW FUNCTIONALITIES

The main purpose of this and forthcoming releases is to enable project coordinators and participants working on FP7 projects to report the scientific results of their projects, using the SESAM application.

This first release in that scope enables reporting (well structured reports) for the RTD funding schemes CP/CSA/NoE. Other funding schemes in RTD and the other RDGs will follow in the coming releases.

In order to support the needs of the FP7 reports new functionality had to be implemented:

- Manage the list of Deliverables as agreed during the Negotiation phase of the project; the user is able to upload and submit deliverables to the Commission, which will then be reviewed and accepted (or rejected). Any modifications to this list are – currently – updated and synchronised to the relevant Grant Management system, in this case CPM. The list of deliverables is then used to compile the Periodic Reports of the project;
- Manage lists of Publications, Patents and IP Rights and Exploitable Foreground at the project level; those lists are then made available to the project user while compiling the Final Report of the project;
- Implement the Periodic, Final, Review and Assessment Reports for the CP/CSA/NoE funding schemes.
- Change concerning the support of a 5th reporting period for report type MCA Financial statement (FormC) for Multi-Partner Contracts;
- Change concerning the support of a 5th reporting period for report type "MC EXT Periodic Activity Report";

2. BUG FIXES / CORRECTIONS

Apart from a number of internal technical changes required to improve the quality of the software, the following bug fixes were implemented:

- Fix concerning the usage of Ecas User-Id; users are now identified by their globally unique Ecas id and not by the non-unique username;
- Fix concerning the problem of lost attachments when a form with the status Completed is Submitted;
- Fix concerning the proper identification of project participants, even after a project amendment changes their order;
- Fix concerning the Report Data Extraction, used by CORDA;
- Fix concerning (SMT the wrong Total amount display in MCA-RTN 'Funding Distribution' report in the section COMMUNITY PREFINANCING DISTRIBUTION - TOTAL FOR ALL CONTRACTOR
- Fix concerning (SMT IM0001653251) the wrong display of the amounts (set to 0.0) when the same participant Legal Name appears several times in the report (e.g. CNRS organisation) in the MCA-RTN Summary Financial Report
- Fix concerning (SMT IM0001672054) the 'Third Party Amount' not included in the total MCA-RTN Whole period Report
- Fix concerning (SMT IM0001614739) the wrong participants index displayed in the MCA-EST Funding Distribution report (e.g. participants index displayed in the order: 1, 4, 4, 3, 4, 8, 6, ...)
- Fix concerning (SMT IM0001708291) the data not correctly imported from submitted P2 report to 3rd report (MCA-RTN Periodic Activity Report)
- Fix concerning (SMT IM0001718523) the wrong display of the Total PPM set to 0.0 instead of the right total amount (MCA-EST Periodic Activity Report)
