

WORKSHOP – NETWORKING EVENT

Biotechnological and molecular approaches to plant breeding

Key technologies for improving the agricultural crops and products, molecular approach in plant population biology, biodiversity and green infrastructure

Tuesday September 25, 2012; 10:00 – 13:00

DLR meeting room, Rue du Trone 98, B-1050 Brussels, 7th floor

The aim of this event is to help to establish and facilitate contacts among researchers from various countries so they can develop a useful collaboration which can lead to the formation of a project consortium. Another goal is to introduce research potential in this area to the European Commission and to obtain more information on the topic from the EC point of view.

PROGRAMME

Short presentations (10-15 min) of experts from various European countries introducing their research institutions, current activities, potential interest in FP7 projects and visions for the future collaboration will be followed by a presentation by the European Commission representative that will provide a deeper insight into the topic of the call for proposals. An open discussion will follow.

Confirmed speakers:

Vladislav Čurn - University of South Bohemia (Czech Republic)
Jan Těšitel, Zuzana Boukalová - Vodní zdroje (Czech Republic)
METCENAS - TBC (Czech Republic)
CENIA - TBC (Czech Republic)
