e|Government

Austrian Computer Society

5th Eastern European e|Gov Days

11 –13 April 2007, Prague (CZ)

Jointly organised by:
Austrian Computer Society (OCG) - Forum e|Government (AT)
EPMA Prague (CZ), eGovernment Visegrad group of partners (PL, HU, SK, CZ)
ePSIPlus network

With kind support of the Prague Municipality and the Vysocina region (CZ)

Call for papers

All member states of the enlarged Europe are facing the challenge of ICT enabled transformation of traditional ways of Governance, ensuring efficient and inclusive eGovernment and decision making. The Eastern European e|Gov Days as a joint event are providing a solid platform for learning from each other and for ensuring technology transfer between the Eastern European countries and Western Europe, bringing advantages to the whole community. The joint event will take place in Prague and so continuing the very successful 2006 event.

The eGovernment take-up in Europe has brought a lot of new issues to solve, including specific technologies and approaches for better eGovernment services for business and governmental cooperation.

Thematic sessions will include issues like:
- Technologies for eGovernment and decision-making,
- Change Management for eGovernment,
- eGovernment to eBusiness (SMEs facing eGovernment, G2B interoperability),
- Transfer of knowledge for eGovernment solutions,
- Creating value from Public Sector Information
- ERP systems in governmental settings,
- eGovernment in municipalities and regions (supporting the Local Digital eGovernment agenda),
- Teaching and training eGovernment (Master classes, professional training offers, eLearning)

On April 11th, the eastern European eGov Days *provide a platform for eGovernment project workshops (apart from the* possibility to present project results in the main conference on April 12 -13, 2007).

Program schedule: April 11, 2006: eGovernment project workshops
                         April 12 -13, 2006: Eastern European e|Gov Days with exhibition
