As an industrial park in Mersin, Turkey(Mersin Tarsus Organized Industrial Zone), we're particularly interested in Concerto projects, since we own our distribution network of natural gas and electricity. We host and provide services to more than 140 SMEs. Our region, Mersin lies on the shores of Eastern Mediterranean. Mersin receives 2956 hrs of sunshine in a year and total solar radiation is 1390 kWh/m<sup>2</sup>(flat surface). We would like to participate in a consortium dealing with solar energy, and/or biofuels and/or also energy efficiency issues in manufacturing industry.

Any major city centre regeneration projects, particularly with major education or health element
