

“Nanotechnologies. Novel nanostructured and carbon materials”

Exhibition-seminar. Russian Centre of Science and Culture ,
1040 Wien, Bramsplatz, 8
24-25 November 2009

Exhibition description

1. Large synthetic HPHT diamond monocrystals: high purity, boron and nitrogen doped
2. CVD diamond films on different layers
3. Quick response diamond semiconductor temperature sensors
4. NanoScan - nanohardnessmeter on the base of atomic force microscope with diamond indenter
5. Nanostructured bulk materials
6. Novel carbon nanomaterials based on a low-density graphite foil
